

Software Engineering Design: Theory and Practice  
by Carlos E. Otero  
Errata – November 13, 2012

## Chapter 1

### Page 5:

The nine-dot puzzle should have 4 requirements instead of 3. Add the last requirement as follows: “4. A line must pass through every dot”

### Page 23:

In the Software Architect section, change “...are required to be skilled in initiation..” to “... are required to have strong initiative...”

### Page 31:

For consistency throughout the book, in the Design for Minimizing Complexity section, change “Finally, code design ...” to “Finally, construction design ...”
